Hamburg, Germany

Results-driven Engineer specialized in Python automation and AWS cloud infrastructure , with a proven track record of reducing manual operational overhead by up to 85%. Expert at architecting scalable CI/CD pipelines and containerized environments that have slashed build configuration times by 80% and local setup times by 40%. Distinguished by a unique ability to bridge the gap between robust system reliability and advanced data analytics.

PROFESSIONAL EXPERIENCE

Working Student - Python Developer, 11/2024 – Present | Hamburg, Germany
NXP Semiconductors

- Refactored legacy Bash-based benchmarking system into a modular Python RISC-V benchmarking codebase, improving cross-platform compatibility and reducing script maintenance overhead by **50%**
- Engineered high-precision time measurement and logging utilities to identify bottlenecks in the build and simulation pipeline
- Reduced build configuration time and effort by **80%** through Python automation and the development of YAML-driven automated config generation
- Architected a scalable, modular testing suite utilizing PyTest, significantly increasing code coverage and ensuring the continuous stability and reliability of the framework

Working Student — IT Consultant/DevOps, *t2consult* 04/2023 – Present | Preetz, Germany

- Architected and containerized full-stack applications using Docker, which **reduced local environment setup time by 40%** and ensured **100% consistency** across development and production stages
- Engineered automated CI/CD pipelines utilizing TeamCity and Octopus Deploy, which accelerated release cycles and reduced manual deployment errors
- Provisioned and optimized AWS cloud infrastructure, leveraging Lambda for task automation and DMS for high-volume data migrations to Amazon Redshift, ensuring data integrity across large-scale environments
- Implemented a robust monitoring ecosystem using Zabbix, resulting in proactive issue resolution and high service availability
- Automated database lifecycle management by integrating Flyway with GitHub Actions, which reduced manual deployment effort by **85%** and ensured **100% version-controlled consistency** of schema updates

Teaching Assistant & Web Developer, 08/2021 – 08/2022 | Famagusta, Cyprus
Eastern Mediterranean University

- Engineered and deployed three specialized full-stack applications—including an automated Grading System and a Covid-19 tracking platform—to digitize and streamline faculty administrative processes
- Managed and optimized the faculty's official website, ensuring continuous availability and implementing technical updates to enhance information accessibility for the academic community
- Provided technical mentorship and instructional support to students in web development and programming fundamentals, facilitating lab sessions and fostering a collaborative learning environment

EDUCATION

Master of Science in Data Science, 09/2022 – Present | Kiel, Germany
Kiel University of Applied Sciences

- Developed hands-on projects using Python and its libraries such as Pandas, Numpy, Scipy, and Scikit-learn

- Covered several topics such as Neural Networks, Machine learning, data processing, and data visualization
- Thesis topic: Assessing the Efficacy and Utility of the AMBAR Dataset for Multi-Objective Recommender Systems

Bachelor of Science in Information Technology, 02/2018 – 07/2021 | Famagusta, Cyprus
Eastern Mediterranean University

- Developed "Animal Shelter Management System" web application as the graduation project (awarded as the best project among five others)
- Awarded highest-ranking graduate of the faculty with a GPA of 1.1 (German grading system)

TECHNICAL SKILLS

Languages & Frameworks
Python (FastAPI, PyTest), Go, Java, SQL, JavaScript (Node.js, React), CSS (TailwindCSS, Bootstrap)

Cloud & DevOps
Amazon Web Services (AWS), Docker, Kubernetes, GitHub Actions, TeamCity, Jenkins, Octopus Deploy, Flyway, Zabbix, Prometheus, Grafana, NGINX, Terraform, Ansible, ETL Processes

Data Science
Statistical analysis, Data Modeling and Architecture, Machine learning, Neural Networks, Power BI, Scikit-Learn, Numpy, Scipy, Pandas

SOFT SKILLS

Collaboration & Communication
Cross-functional teamwork, Technical documentation, Mentoring & knowledge sharing

Analysis & Execution
Analytical problem-solving, Time management, Attention to detail.

Adaptability & Growth
Continuous learning (Eager to Learn), Flexibility, Resilience in fast-paced environments

LANGUAGES

English (C1) • **German** (B1) • **Turkish** (B1) • **Persian** (Native)

CERTIFICATES

- Machine Learning A-Z™: Python & R in Data Science
- Python and Django Full Stack Web Developer Bootcamp
- The Complete Python Bootcamp from Zero to Hero in Python
